PROFESSIONAL SUMMARY

Data analyst with 3+ years of experience cleaning operational data, tracking KPIs, and building reports that support business decisions. M.S. in Data Science with hands-on SQL, Excel, Python, Power BI, and Tableau; currently analyzing nonprofit service data and building data-quality tools.

EXPERIENCE

Volunteer Data Analyst | *Good in the 'Hood* | Minneapolis, MN | **Oct 2026 - Present**

- Made nonprofit service reports more reliable by cleaning and reconciling 2025 and 2026 service summaries in Excel, SQL, and Python, and documenting missing data and inconsistent definitions.
- Helped the team evaluate expansion priorities by comparing service-site activity with Twin Cities community needs and identifying coverage gaps for follow-up.

Data & Recruitment Analyst | *Avance Consulting* | Hyderabad, India | **Feb 2021 - Aug 2024**

- Gave recruiting managers more consistent pipeline data by cleaning 600+ ATS records, removing duplicates, and standardizing candidate statuses in Excel.
- Helped managers identify recruiting bottlenecks and prioritize follow-ups by building Excel KPI dashboards for recruiter activity, pipeline movement, and turnaround time.

PROJECTS

Vexa - AI-Powered Data Operations Intelligence | Python, Pandas, Streamlit, SQLite, Groq LLM

- Made discrepancies easier to investigate by building a Python/Pandas app that compares two Excel or CSV reports and flags missing records, duplicate IDs, and mismatched values.
- Enabled traceable, analyst-controlled corrections by connecting Groq AI guidance with review decisions, SQLite audit logs, and downloadable original-versus-corrected reports.

Carelio & Carelio Connect - Community Needs Analytics | Python, Pandas, SQL, Streamlit, Power BI

- Helped users compare community needs across all 87 Minnesota counties by combining public health, food-access, and socioeconomic data into explainable priority scores and interactive dashboards.
- Made resource-access gaps easier to explore by extending Carelio with service-location and coverage views for community organizations.

Financial Calendar Modeling & Analytics | *Snowflake SQL*

- Made fiscal-period calculations reusable for reporting by creating Snowflake SQL calendar and business-day tables with holiday and quarter-end logic.

EDUCATION

University of St. Thomas | M.S. in Data Science | St. Paul, MN | May 2026

Relevant Coursework: Data Analytics & Visualization, SQL, Data Warehousing, Data Lakes, Machine Learning & AI

SKILLS

Data Analysis: SQL, Python (Pandas), Excel (PivotTables, Power Query), data cleaning, reconciliation, validation, KPI reporting
BI & Reporting: Power BI, Tableau, Streamlit, dashboard development, stakeholder reporting
Platforms & Tools: Snowflake, Databricks, SQLite, AWS (S3, EC2, EMR), Git/GitHub, Groq LLM
