SUMMARY

Data Analyst with 3+ years of experience in reporting, data cleaning, dashboard development, and stakeholder analytics, supported by an M.S. in Data Science. Skilled at turning messy operational and public datasets into decision-ready SQL reports, KPI dashboards, and prioritization tools using Python, SQL, Excel, Tableau, Power BI, Snowflake, and Databricks. Focused on improving data quality, shortening manual reporting cycles, and communicating insights clearly to technical and non-technical teams.

EDUCATION

University of St. Thomas - St. Paul, MN

Aug 2024 - May 2026

M.S. in Data Science

Relevant Coursework: Data Analytics & Visualization, SQL, Data Warehousing, Data Lakes, Machine Learning & AI

PROJECTS

Carelio - Minnesota Public Health & Food Support Prioritization Tool | Python, SQL, Pandas, Streamlit, Power BI

- Created an end-to-end analytics pipeline using public food access, health, insurance, school lunch, and income datasets for all 87 Minnesota counties.
- Built a priority scoring model and interactive dashboard with rankings, filters, KPI cards, and visual views, reducing county comparison work from hours to seconds for nonprofit planning.
- Validated dashboard logic through feedback from food insecurity stakeholders, improving filter design, methodology clarity, and decision-making usability.

AI Impact on the Job Market (2024-2030) | Python, SQL, Tableau

- Cleaned and standardized 5,000+ labor market records across 15 industries, resolving missing values and inconsistencies to achieve 98%+ data integrity.
- Designed a Tableau dashboard analyzing salary, automation risk, remote-work adoption, and job-growth projections, helping users identify 3 high-risk occupation clusters in under 5 minutes.

Amazon Reviews Sentiment & Helpfulness Analysis (2023) | Python, SQL, Databricks

- Normalized and analyzed 571M+ Amazon review records across 9 categories in Databricks using Python and SQL, creating analysis-ready datasets for sentiment and helpfulness trends.
- Built dashboards surfacing rating shifts, verified-purchase impact, and review helpfulness drivers, highlighting category-level patterns for product and customer insight.

Financial Calendar Modeling & Analytics | Snowflake SQL

- Modeled fiscal-period and business-day tables in Snowflake SQL, incorporating holidays and quarter-end logic to reduce recurring finance reporting prep by 4 hours/month.

WORK EXPERIENCE

Avance Consulting - Hyderabad, India

Feb 2021 - Aug 2024

Data & Recruitment Analyst / Team Lead

- Analyzed 600+ candidate and pipeline records across Excel and ATS platforms, standardizing fields and removing duplicates to achieve 95%+ data accuracy and reduce reconciliation rework by 20%.
- Developed weekly and monthly Excel KPI dashboards tracking submissions, placement rates, recruiter productivity, and pipeline movement, helping managers identify bottlenecks and improve follow-up priorities.
- Translated client requirements and recruiting trends into clear reports for technical and non-technical stakeholders, supporting faster decisions on candidate quality, submissions, and team performance.
- Guided reporting consistency for an 8-member recruiting team by documenting data-entry standards, reviewing weekly updates, and improving ATS data reliability.

SKILLS

Languages & Analytics Tools: SQL, Python (Pandas, NumPy), Excel (PivotTables, Power Query, VLOOKUP), Tableau, Power BI, Streamlit

Data Platforms: Snowflake, Databricks, AWS (S3, EC2, EMR, Cloud9), Git/GitHub, Microsoft 365

Analytics: KPI dashboards, EDA, data cleaning, data validation, data warehousing, requirements gathering, stakeholder reporting, business intelligence
